Jeff Wenz is a Swiss Army knife of all things tech: versatile, hands-on, and always ready to jump into the action. Often nicknamed the “human Google”, Jeff brings an immense set of skills and knowledge of IT networking, multimedia integration, and technical project management to the table. He holds a Bachelor’s degree in Animation, specializing in rigging and 3D motion capture and scanning with experience across the entire animation pipeline.

Jeff’s creative toolkit includes Autodesk Maya, Unreal Engine, the entire Adobe Creative Suite and much more. He also has solid experience with IT networking systems like NVIDIA Omniverse, VMware, and QNAP servers. Whether solo or part of a team, Jeff thrives under pressure, gives 110%, and brings a contagious energy that motivates those around him.

Tech isn’t just Jeff’s career; it’s his lifestyle. In his downtime, he enjoys gaming, pop culture events like PAX and Comic-Con, and exploring VR videography with 360° cameras and LiDAR depth sensors. He’s also deeply into anime and gaming culture and staying on top of the latest tech news.

Based in Greater Melbourne on a Post Graduate Visa, Jeff is ready to hit the ground running. Once established in a role, he’s able to transition to a Work Visa, bringing long term commitment, reliability, and a seamless experience to any team he joins. He treats every role like it matters; because to Jeff, it does.

EXPERIENCE

2013-09 - Present

Senior Media Arts Director - *Pakenham Baptist Church*

Pakenham, Victoria, Australia

• Communicaiton • Cross-disciplinary Thinking • Dependability • File and Data Management • Leadership • Multitasking • Teamwork • Training • Troubleshooting •

For over 12 years, I've managed visual production for weekly services, events, and special occasions at Pakenham Baptist Church. I work live alongside the audio, camera, and livestream teams to keep everything running smoothly. I've use ProPresenter 5 (2012-2019) and 7 (2020-presnet), create graphics in Adobe Photoshop and Illustrator, and handle service planning, data management, and automations using Microsoft Office. The role has sharpened my skills in leadership, communication, multitasking, and real-time problem solving.

2019-04 - Present

Audio/Visual Installation - *JAVIS [Jeff's Audio/Visual Installation Service]*

Pakenham, Victoria, Australia

• Business Management • Client • Communication • Time Management • Training • Troubleshooting •

JAVIS is my self-operated business providing end-to-end A/V solutions for venues, churches, and events. I handle everything from site inspection and quotation to installation and staff training. Setups range from full A/V systems and EQ to streaming, lighting, and display configurations. I also provide ongoing support and handle warranty issues as needed. This work has strengthened my skills in business management, client communication, time management, training, and hands-on troubleshooting.

2015-05 - Present

Videographer and Video Editor - *My Family Memories [Formerly "Sparemoment Productions"]*

Pakenham, Victoria, Australia

• Communication • Cross-disciplinary Thinking • Dependability • File and Data Management • Leadership • Multitasking • Teamwork • Troubleshooting •

As a sub-contract employee of My Family Memories, my responsibilities include set up and operation of cameras and livestreaming equipment for special events. Primarily funerals (usually contracted by Handley Funeral Services), my experience includes: presentation services, weddings, concerts and other extracurricular events. When operating, I work with a member from audio and sometimes a second visuals member, silently communicating live to create a seamless viewing experience. The role has sharpened my skills in leadership, communication, multitasking, and real-time problem solving.

2017-10 - 2025-07

Retail - *JB Hi-Fi Home Pakenham*

Pakenham, Victoria, Australia

• Communication • Feedback • Leadership • Multitasking • Positive Attitude • Public Speaking • Teamwork • Troubleshooting •

JB Hi-Fi is a massive electronic chain store. As a sales teammember for almost 8 years, it was my role to learn about and train with various products throughout different departments and compile complete solutions for customers. Throughout my years in retail, I led and trained new and existing staff on new, upcoming, and existing tech for customers. I represented Apple for part of this time showcasing leadership and "paying it forward" with Apple's latest gear. I performed Telstra operations for consumer and sole business customers for network connection needs. Handling and testing faulty appliances was also a regular part of the role involving troubleshooting and explaining with customers and clients to resolve problems.

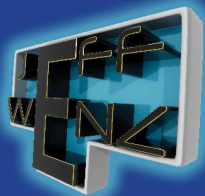

2024-05 - 2024-06

Animation Intern - *Sandpit [Melbourne Interactive Media Studio]*

Melbourne, Victoria, Australia

• Cross-disciplinary Thinking • Feedback • Teamwork • Troubleshooting •

Sandpit is a Melbourne-based studio creating interactive media for businesses and events. I worked on an NDA project known internally as "the NKE," where I developed a custom VR tool that lets the user interact with and explore 3D models. The project was built in Unreal Engine using Visual Studio C++, with collaboration and documentation handled via Google Workspace and Git. The role sharpened my cross-disciplinary thinking, troubleshooting, teamwork, and ability to take and apply feedback in a fast-paced environment.

EXPERIENCE

2018-10 - Present

IT Technician - *WenzTech*

Pakenham, Victoria, Australia

- Client • Communication • Feedback • File and Data Management • Public Speaking • Multitasking • Teamwork • Time Management
- Troubleshooting •

WenzTech is a computer maintenance business who works contract jobs for personal or small business. I have handled everything from basic maintenance to a new install and setup to network installation. Since 2024, WenzTech has worked with AWA as Acer representatives; fixing school laptops for teachers and students and in-house projects for other partnered businesses.

2023-06 - 2023-12

Technical Director - *Gimmick and Bolt*

Melbourne, Victoria, Australia

- Communication • Creative Thinking • Cross-disciplinary Thinking • File and Data Management • Multitasking • Public Speaking • Teamwork •

"Gimmick and Bolt" is a feature animation by Jukebox. I was technical director where my role surrounded ideas and functionality of the different technologies and technical aspects used in the production. 3D animation rigging involving programming for more detailed joints and movements, Omniverse server integration and motion capture were some known credited tasks. As I was testing for the collaborative server, I was responsible for file and data management for the entire feature. Critical thinking, audience testing and presentation were all heavy parts for getting greenlit and out of pre-production.

2023-06 - 2023-08

Production Lead/Producer - *Panels [Animated Short Film]*

Melbourne, Victoria, Australia

- Communication • Conflict Management • Creative Thinking • Cross-disciplinary Thinking • Feedback • File and Data Management • Multitasking • Positive Attitude • Public Spaking • Teamwork • Troubleshooting •

"Panels" is a fictional advert addressing the real-world issue of unsafe cloud services. As Producer and Project Lead, I managed task delegation, scheduling, and file organization, while keeping detailed minutes and daily progress reports. Alongside production duties, I contributed hands-on with rigging, dynamics, rendering, post-production, and 2D effects. I also pitched the project to other groups to recruit freelancers, honing my communication, leadership, and teamwork skills throughout the process.

2016-05 - 2016-07

Chef Apprentice - *Shanikas Pakenham*

Pakenham, Victoria, Australia

- Communication • Dependability • Multitasking • Positive Attitude • Teamwork • Time Management •

During my time at Shanikas, I supported the kitchen team with a range of responsibilities including deep fryer operation, dessert plating, and general food prep. Due to personal reasons, the role was cut short, but it gave me solid hands-on experience in a fast-paced kitchen environment and strengthened my skills in communication, multitasking, teamwork, and time management—all while maintaining a dependable and positive attitude.

2011-06 - 2012-01

Graphic Designer - *C.D. Food Services*

Eastvale, California, United States

- Client • Communication • Feedback • Public Speaking •

After going through a rebranding I was selected as C.D. Food Services designer. For about six months, I applied the new branding across packaging, product labels, and office materials like pens, clocks, and mouse pads. Using Adobe Photoshop, I handled layout work for product names and pre-supplied nutrition facts. The role sharpened my skills in client communication, feedback, and presenting design work with confidence.
